

Drug Induced Thrombocytopenia

Listed below are some drugs that may cause drug induced thrombocytopenia (reduction in platelet count, usually below $150 \times 10^9/L$)

- Digoxin
- Heparin
- Abciximab
- Clopidogrel
- Eptifibatide
- Tirofiban
- Methyldopa
- Amiodarone
- Quinine
- Carbamazepine
- Phenytoin
- Sodium valproate
- Chloramphenicol
- Linezolid
- Penicillins
- Sulphonamides
- Vancomycin
- Trimethoprim
- Rifampicin
- Ganciclovir
- Valganciclovir
- Dantrolene
- Propylthiouracil
- Interferon alfa and beta
- Azathioprine
- Ciclosporin
- Gold
- Infliximab
- Rituximab
- Methotrexate
- Penicillamine
- Sulfasalazine
- Tamoxifen
- Colchicine

- Leflunomide
- Mycophenolate mofetil
- Ranitidine
