

## Medical Abbreviations

The following table lists some medical abbreviations with their intended meaning.

| <b>Abbreviation</b> | <b>Meaning</b>   |
|---------------------|--|
| A                   | atrial fibrillation                                      |
| A & E               | accident and emergency                                   |
| A & W               | alive and well   |
| AAA                 | abdominal aortic aneurysm, acute anxiety attack          |
| AB                  | apex beat  |
| Ab                  | antibody, abortion                                       |
| ABC                 | airway, breathing and circulation                        |
| Abd                 | abdomen, abdominal                                       |
| ABE                 | acute bacterial endocarditis                             |
| ABG                 | arterial blood gases                                     |
| ABR                 | absolute bed rest  |
| ACE                 | angiotensin-converting enzyme                            |
| ACS                 | acute coronary syndrome                                  |
| ACTH                | adrenocorticotrophic hormone                             |
| AD                  | alzheimer's disease                                      |
| ADH                 | antidiuretic hormone                                     |
| ADHD                | attention deficit hyperactivity disorder                 |
| ADL                 | activities of daily living                               |
| ADR                 | adverse drug reaction                                    |
| AED                 | antiepileptic drug                                       |
| AF                  | atrial fibrillation                                      |
| AFB                 | acid-fast bacillus                                       |
| AFP                 | $\alpha$ -fetoprotein                                    |
| Ag                  | antigen  |
| AGL                 | acute granulocytic leukaemia                             |
| AGN                 | acute glomerular nephritis                               |
| AHD                 | autoimmune haemolytic disease                            |
| AI                  | aortic incompetence, aortic insufficiency                |
| AIDS                | acquired immune deficiency syndrome                      |
| AJ                  | ankle jerk   |
| AKA                 | above knee amputation                                    |
| AKI                 | acute kidney injury                                      |
| AL                  | acute leukaemia  |
| ALL                 | acute lymphocytic leukaemia                              |
| ALP                 | alkaline phosphatase                                     |
| ALT                 | alanine transaminase                                     |
| AMA                 | against medical advice                                   |
| AMI                 | acute myocardial infarction                              |
| ANA                 | antinuclear antibody                                     |
| AOB                 | alcohol on breath  |
| AP                  | anteroposterior, alkaline phosphatase, apical pulse      |
| APPT                | activated partial thromboplastin time                    |
| APSAC               | anisoylated plasminogen streptokinase activator complex  |
| AR                  | aortic regurgitation                                     |
| A-R                 | apical-radial pulse                                      |
| ARDS                | adult respiratory distress syndrome                      |
| ARF                 | acute renal failure                                      |
| AS                  | anal sphincter, ankylosing spondylitis, aortic stenosis, |

|       |  |
|-------|--|
|       | arteriosclerosis   |
| ASAP  | as soon as possible  |
| ASB   | asymptomatic bacteriuria   |
| ASD   | atrial septal defect   |
| AST   | aspartate transaminase   |
| ATN   | acute tubular necrosis   |
| AV    | atrioventricular, aortic valve   |
| AXR   | abdominal X-ray (plain)  |
| Ba    | barium   |
| BaE   | barium enema   |
| BAL   | bronchoalveolar lavage   |
| BB    | bed bath   |
| BBA   | born before arrival  |
| BBB   | blood-brain barrier, bundle branch block   |
| BBT   | basal body temperature   |
| BCC   | basal cell carcinoma   |
| BCG   | bacille Calmette-Guerin  |
| BE    | barium enema, bacterial endocarditis   |
| BID   | brought in dead  |
| BJ    | biceps jerk, bones and joints  |
| BKA   | below knee amputation  |
| BM    | bone marrow, bowel movement  |
| BMI   | body mass index  |
| BMR   | basal metabolic rate   |
| BNO   | bowels not open  |
| BOR   | bowels open regularly  |
| BP    | blood pressure   |
| bpm   | beats per minute   |
| BPH   | benign prostatic hypertrophy, benign prostatic hyperplasia                             |
| BR    | bed rest   |
| BS    | bowel sounds, breath sounds, blood sugar   |
| BSA   | body surface area  |
| BT    | bed time, brain tumour, breast tumour  |
| BUN   | blood urea nitrogen  |
| BW    | body water, body weight  |
| BWO   | bowels well open   |
| Bx    | biopsy   |
| C     | complement   |
| C & P | cystoscopy and pyelogram   |
| C & S | culture and sensitivity  |
| c/o   | complains of   |
| CA    | cancer, carcinoma  |
| CABG  | coronary artery bypass graft   |
| CAD   | coronary artery disease  |
| CAPD  | continuous ambulatory peritoneal dialysis  |
| CAT   | computer assisted tomography, computed axial tomography, computerised axial tomography |
| CAVHD | continuous arteriovenous haemodialysis   |
| CBC   | complete blood count   |
| CBS   | chronic brain syndrome   |
| CC    | chief complaint  |
| CCF   | congestive cardiac failure   |
| CCU   | coronary care unit   |
| CDT   | <i>Clostridium difficile</i> toxin   |
| CEA   | carcinoembryonic antigen   |
| CF    | complement fixation, cystic fibrosis   |
| CFT   | complement fixation test   |
| CGL   | chronic granulocytic leukaemia   |
| CGN   | chronic glomerular nephritis   |
| CHB   | complete heart block   |
| CHD   | coronary heart disease   |

|       |   |
|-------|---|
| CHF   | congestive heart failure  |
| CHP   | charcoal haemoperfusion   |
| CI    | cardiac index   |
| CICr  | creatinine clearance (mL/min)   |
| CK    | creatine kinase   |
| CKD   | chronic kidney disease  |
| CL    | clubbing  |
| CLL   | chronic lymphocytic leukaemia   |
| CML   | chronic myelocytic leukaemia  |
| CMV   | cytomegalovirus   |
| CNS   | central nervous system  |
| CO    | cardiac output  |
| COAD  | chronic obstructive airways disease   |
| COD   | cause of death  |
| COLD  | chronic obstructive lung disease  |
| COPD  | chronic obstructive pulmonary disease   |
| CPAP  | continuous positive airway pressure   |
| CPD   | continuous peritoneal dialysis  |
| CPK   | creatine phosphokinase  |
| CPR   | cardiopulmonary resuscitation   |
| CRD   | chronic renal disease   |
| CRF   | chronic renal failure, corticotrophin-releasing factor                        |
| CRP   | C-reactive protein  |
| CSF   | cerebrospinal fluid, colony stimulating factor                                |
| CSM   | cerebrospinal meningitis  |
| CSU   | catheter specimen of urine  |
| CT    | circulation time, clotting time, computerised tomography, coronary thrombosis |
| CV    | cardiovascular, central venous cerebrovascular                                |
| CVA   | cerebrovascular accident  |
| CVD   | cardiovascular disease  |
| CVP   | central venous pressure   |
| CVS   | cardiovascular system   |
| Cx    | cervix, cervical  |
| CXR   | chest X-Ray   |
| Cy    | cyanosis  |
| d     | dead, deceased  |
| D     | diagnosis   |
| D & C | dilatation and curettage  |
| D & E | dilation and evacuation   |
| D & V | diarrhoea and vomiting  |
| D/W   | discussed with  |
| DBP   | diastolic blood pressure  |
| DDU   | drug dependency unit  |
| DH    | drug history  |
| DI    | drug information  |
| DIC   | disseminated intravascular coagulation  |
| DIP   | distal interphalangeal (joint)  |
| DJD   | degenerative joint disease  |
| DKA   | diabetic ketoacidosis   |
| DM    | diabetes mellitus, diastolic murmur   |
| DNA   | did not attend (outpatients)  |
| DNC   | did not come  |
| DNR   | do not resuscitate  |
| DOA   | dead on arrival   |
| DOB   | date of birth   |
| DOE   | dyspnoea on exertion  |
| DST   | dexamethasone suppression test  |
| DT    | delirium tremens  |
| DTNT  | door to needle time   |
| DU    | duodenal ulcer  |

|                  |  |
|------------------|--|
| DUB              | dysfunctional uterine bleeding   |
| DVT              | deep vein thrombosis   |
| Dx               | diagnosis  |
| DXT              | deep X-ray therapy   |
| EBM              | expressed breast milk  |
| EBV              | Epstein-Barr virus   |
| ECF              | extracellular fluid  |
| ECG              | electrocardiogram  |
| ECHO             | echocardiogram   |
| ECT              | electroconvulsive therapy  |
| EDD              | expected date of delivery  |
| EEG              | electroencephalogram   |
| EENT             | eyes, ears, nose and throat  |
| EFA              | essential fatty acids  |
| eGFR             | estimated glomerular filtration rate (mL/ min/1.73m <sup>2</sup> )                                 |
| ELBW             | extremely low birth weight   |
| ELISA            | enzyme-linked immunosorbent assay  |
| EM               | ejection murmur  |
| EMG              | electromyogram   |
| ENT              | ear, nose and throat   |
| EP               | ectopic pregnancy  |
| EPO              | erythropoietin   |
| ERCP             | endoscopic retrograde cholangiopancreatography   |
| ERPC             | evacuation of retained products of conception  |
| ESM              | ejection systolic murmur   |
| ESN              | educationally subnormal  |
| ESP              | end-systolic pressure  |
| ESR              | erythrocyte sedimentation rate   |
| ESRF             | end stage renal failure  |
| ET               | endotracheal tube  |
| EtOH             | ethyl alcohol  |
| FB               | finger breadths, foreign body  |
| FBC              | full blood count   |
| FBS              | fasting blood sugar  |
| FDP              | fibrin degradation products  |
| FEV 1            | forced expiratory volume in 1 second   |
| FFA              | free fatty acids   |
| FFP              | fresh frozen plasma  |
| FH               | family history   |
| FHR              | foetal heart rate  |
| FiO <sub>2</sub> | fraction of inspired oxygen  |
| FLP              | fasting lipid profile  |
| FOB              | faecal occult blood  |
| FP               | family planning, frozen plasma   |
| FSH              | follicle-stimulating hormone   |
| FT4              | free thyroxine   |
| FUO              | fever of unknown origin  |
| FVC              | forced vital capacity  |
| Fx.              | fracture   |
| G6PD             | glucose-6-phosphate dehydrogenase  |
| GA               | general anaesthesia, general anaesthetic, gastric analysis, granuloma annulare, general appearance |
| GABA             | γ-aminobutyric Acid  |
| GB               | gall bladder   |
| GC               | gonococcal, gonococcus   |
| GCS              | glasgow coma scale   |
| G-CSF            | granulocyte colony-stimulating factor  |
| GE               | gastroenterology   |
| GFR              | glomerular filtration rate (mL/ min/1.73m <sup>2</sup> )   |
| g-GT             | γ-glutamyl transferase   |
| GH               | growth hormone   |

|            |   |
|------------|---|
| GI(T)      | gastrointestinal (tract)                            |
| GN         | glomerulonephritis                                  |
| GnRH       | gonadotrophin-releasing hormone                     |
| GPA        | granulomatosis with polyangiitis                    |
| grav.      | gravid (pregnant)                                   |
| GS         | general surgery, genital system                     |
| GTT        | glucose tolerance test                              |
| GU         | gastric ulcer, genitourinary, gonococcal urethritis |
| GUS        | genitourinary system                                |
| Gyn.       | gynaecology   |
| H          | hypodermic  |
| H & L      | heart and lungs                                     |
| H & P      | history and physical                                |
| h/o or H/O | history of  |
| HA         | haemolytic anaemia                                  |
| HAV        | hepatitis A virus                                   |
| HB         | heart block   |
| Hb         | haemoglobin   |
| HbA1       | glycosylated haemoglobin                            |
| HBD        | hydroxybutyrate dehydrogenase                       |
| HbF        | foetal haemoglobin                                  |
| HBF        | hepatic blood flow                                  |
| HPB        | high blood pressure                                 |
| HBsAg      | hepatitis B surface antigen                         |
| HBV        | hepatitis B virus                                   |
| HCC        | hepatocellular carcinoma                            |
| hCG        | human chorionic gonadotrophin                       |
| Hct.       | haematocrit   |
| HCV        | hepatitis C virus                                   |
| HCVD       | hypertensive cardiovascular disease                 |
| HD         | heart disease, Hodgkin's disease                    |
| HDL        | high-density lipoprotein                            |
| HDU        | high dependency unit                                |
| HDV        | hepatitis D virus                                   |
| hep        | hepatitis   |
| HF         | heart failure                                       |
| HHD        | hypertensive heart disease                          |
| HHT        | hereditary haemorrhagic telangiectasia              |
| HHV        | human herpes virus                                  |
| HIV        | human immunodeficiency virus                        |
| HLA        | human leukocyte antigen                             |
| HMMA       | 4-hydroxy-3-methoxymandelic acid                    |
| HPA        | hypothalamus, pituitary, adrenal                    |
| HPC        | history of present complaint                        |
| HPV        | human papilloma virus                               |
| HR         | heart rate  |
| HRT        | hormone replacement therapy                         |
| HS         | heart sounds  |
| HSP        | Henoch–Schönlein purpura                            |
| HSV        | herpes simplex virus                                |
| HSVE       | herpes simplex virus encephalitis                   |
| HT         | hypertension  |
| HTVD       | hypertensive vascular disease                       |
| HUS        | haemolytic uraemic syndrome                         |
| HVA        | homovanillic acid                                   |
| Hx.        | history   |
